EXPERIENCE

IT Specialist

Aug 2025 – Present

Rowe Casa Organics · Hooks, TX

- Architected **Orbit AI**, a self-hosted multi-tenant Claude Code platform with per-user PTY isolation, automatic file locking, and AES-256-GCM token encryption. Deployed at orbitai.work behind a Cloudflare tunnel.
- Built a **12-dashboard analytics platform** over a Cloudflare Worker API backend with KV caching and cron-based ETL pulling live data from two Shopify stores; now a primary metrics resource for C-Suite leadership.
- Architecting a **demand forecasting platform** on Azure Data Factory, Azure SQL, and the Nixtla ML stack (StatsForecast, LightGBM, HierarchicalForecast) with multi-channel integration from Shopify, Amazon SP-API, and DEACOM ERP.
- **Google Workspace → Microsoft 365 migration** for the entire org with Active Directory provisioning, Exchange Online, Entra ID, and conditional access policies.
- Supported the company-wide **DEACOM ERP rollout**. Configured department workflows, deployed Intune-managed barcode scanners for warehouse inventory tracking, and trained end users through the transition.
- Manage day-to-day IT operations including Intune MDM, UniFi networking, ThreatLocker endpoint security, and SuperOps RMM for patching and remote access.

Data & Customer Engagement Intern

Jan 2023 – Feb 2025

Michigan Health Information Network (MiHIN) · Remote

- Queried and validated healthcare datasets in SQL and Excel in support of Michigan's statewide health information exchange.
- Acted as liaison between MiHIN and healthcare organizations to facilitate secure data exchange via destination strings; onboarded and decommissioned organizations through Jira and HubSpot.
- Collected and analyzed data for Root Cause Analysis (RCA) requests to resolve internal data integrity issues.

SELECTED PROJECTS hayden-howell-portfolio.web.app

Orbit AI: Multi-tenant team-based AI coding platform with browser xterm.js terminals, per-user PTY isolation, automatic file locking, real-time SSE activity, and team rules synced to CLAUDE.md. *Bun, Hono, SQLite, React 19, xterm.js, node-pty, Cloudflare Tunnel, Firebase Auth, AES-256-GCM, Tauri v2*

Forecasting Platform (in progress): Custom demand forecasting solution replacing manual spreadsheets with an automated ML pipeline. Tiered approach: StatsForecast baselines, LightGBM for top SKUs, HierarchicalForecast for multi-channel reconciliation. *Azure Data Factory, Azure SQL, Azure Functions, Python, Nixtla, LightGBM, Power BI*

Operations Analytics Dashboard: 12-dashboard platform on a Cloudflare Worker API backend with KV caching, cursor-based pagination, and cron ETL processing live data from two Shopify stores. *JavaScript, Cloudflare Workers/KV, Shopify REST API, Chart.js, Firebase, Python*

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, HTML, CSS

Data & Cloud: Azure (Data Factory, SQL, Functions, Key Vault), Cloudflare (Workers, KV, Tunnel), Firebase / Firestore, Bun, Hono, Node.js, SQLite, ETL Pipelines, Cron Scheduling, API Integration, Power BI, Pandas

AI & Security: Claude Code CLI, Anthropic API, Prompt Caching, Multi-Agent Orchestration, AES-256-GCM, JWT (jose), HMAC Key Derivation, Firebase OAuth

Infrastructure: Microsoft 365, Active Directory, Entra ID, Intune MDM, UniFi, ThreatLocker, SuperOps RMM, DEACOM ERP, systemd, Docker, GitHub Actions

EDUCATION

Bachelor of Science in Computer Science

Aug 2021 – May 2025

Texas A&M University – Texarkana
