SUMMARY

Computer Science graduate and aspiring data engineer with experience designing data pipelines, building real-time analytics platforms, and developing AI-integrated tools. Architected Orbit AI, a multi-tenant team-based Claude Code platform deployed on a self-hosted VM behind a Cloudflare tunnel. Built a 12-dashboard operations platform pulling live Shopify data through a Cloudflare Worker backend. Also manage day-to-day IT operations including Microsoft 365, Intune MDM, UniFi networking, and ThreatLocker.

EXPERIENCE

IT Specialist

Aug 2025 – Present

Rowe Casa Organics · Full-time

Hooks, TX · On-site

- Architected Orbit AI, a self-hosted multi-tenant Claude Code platform our IT team uses to collaborate on projects, with per-user isolation and automatic file locking.
- Built a 12-dashboard analytics platform pulling live data from two Shopify stores through a Cloudflare Worker API backend with KV response caching, cursor-based pagination, and automated ETL. Now one of the primary metrics resources for C-Suite leadership.
- Built data pipelines that fetch, transform, and cache order, fulfillment, and shipping data every 6 hours with 30-minute incremental refreshes and nightly backfills.
- Architecting a demand forecasting platform using Azure Data Factory, Azure SQL, and Nixtla ML with multi-channel integration from Shopify, Amazon SP-API, and DEACOM ERP.
- Supported company-wide DEACOM ERP rollout. Configured workflows, deployed Intune-managed barcode scanners, and trained departments.
- Completed Google Workspace to Microsoft 365 migration with Active Directory provisioning, Exchange Online, Entra ID, and conditional access policies.
- Managed day-to-day IT operations including ticketing, UniFi networking, ThreatLocker, SuperOps RMM, and Intune MDM across iPads, scanners, and endpoints.

Data Entry Specialist

Jan 2024 – Feb 2025

Michigan Health Information Network Shared Services (MiHIN) · Internship

Texarkana, TX · Remote

- Queried and validated healthcare datasets using SQL in support of Michigan's statewide health information exchange.
- Maintained data integrity across large Excel datasets, ensuring accuracy for downstream reporting and compliance.
- Collaborated across teams using HubSpot and Jira to ensure consistent data pipelines and task tracking.

Customer Engagement Team

Jan 2023 – Jan 2024

Michigan Health Information Network Shared Services (MiHIN) · Internship

Texarkana, TX · Remote

- Acted as liaison between MiHIN and healthcare organizations to facilitate secure data exchange.
- Created and managed communication pathways using destination strings.
- Onboarded and decommissioned organizations via Jira tickets and HubSpot.

- Collected data for Root Cause Analysis (RCA) requests to resolve internal issues.

PROJECTS hayden-howell-portfolio.web.app

Orbit AI: Multi-tenant team-based AI coding platform with browser-based Claude Code terminal, automatic file locking, real-time SSE activity, per-user encryption, and team rules synced to CLAUDE.md.

Bun, Hono, SQLite, React 19, Vite, Tailwind, xterm.js, node-pty, Tauri, Cloudflare Tunnel, Firebase Auth

Forecasting Solution (In Progress): Custom demand forecasting platform with Azure Data Factory ETL, Azure SQL warehouse, and Nixtla ML. Multi-channel integration from Shopify, Amazon SP-API, and on-premises ERP.

Azure SQL, Azure Data Factory, Python, StatsForecast, LightGBM, Power BI

Operations Analytics Dashboard: 12-dashboard platform with Cloudflare Worker API backend, KV caching, and cron-based ETL processing live data from two Shopify stores.

JavaScript, Python, Cloudflare Workers/KV, Shopify REST API, Chart.js, Firebase, SQL

HR Admin & TV Display System: Monorepo admin dashboard with real-time Firestore sync to Airtame-connected TV displays for employee recognition. Deployed on every facility TV.

React, TypeScript, Firebase, Cloud Functions, Firestore

Shipping Department Leaderboards: Real-time leaderboard on warehouse TVs ranking employees by fulfillment performance via ShipStation API data.

HTML, CSS Grid, JavaScript, ShipStation API, Google Sheets

IT Help Portal: Internal IT portal with conditional surveys, request forms, role-based access, and Firestore to Google Sheets pipeline.

JavaScript, Firebase, Google Apps Script

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, HTML, CSS

Cloud & Backend: Bun, Hono, Node.js, SQLite, Azure (SQL, Data Factory, Functions, Key Vault), Firebase, Firestore, Cloudflare (Workers, KV, Tunnel), WebSocket, SSE

Tools & DevOps: Git, GitHub, GitHub Actions, Docker, React, Vite, Tauri v2, xterm.js, node-pty, Jira, HubSpot

Data Engineering: ETL Pipelines, Azure Data Factory, Azure SQL, Cloudflare Workers/KV, Cron Scheduling, API Integration, Power BI, Chart.js, Pandas

IT Infrastructure: Microsoft 365, Active Directory, Entra ID, Intune MDM, UniFi Networking, ThreatLocker, SuperOps RMM, DEACOM ERP, systemd

AI & Security: Claude Code CLI, Anthropic API, Prompt Caching, Multi-Agent Orchestration, AES-256-GCM, JWT (jose), HMAC Key Derivation, Firebase OAuth

EDUCATION

Bachelor of Science in Computer Science
Texas A&M University – Texarkana

Aug 2021 – May 2025
